Current position

Assistant Professor
Varma Family Professor in Robotics
Department of Electrical and Computer Engineering
University of Waterloo

Member

- Waterloo Climate Institute
- Waterloo Institute for Sustainable Energy
- Waterloo Institute for Sustainable Aeronautics

Previous positions

- Nov 2021 – Dec 2021: Visiting scholar, Technische Hochschule Ingolstadt, Ingolstadt, Germany
- Nov 2020 – Sep 2021: Postdoctoral researcher, CNRS, Rennes, France
- Jul 2019 – Aug 2019: Visiting scholar, Stanford University, Stanford, CA, USA
- May 2017 – Aug 2020: Graduate research assistant, Georgia Institute of Technology, Atlanta, GA, USA
- Jan 2017 – Aug 2020: Member of the Robotarium team, Georgia Institute of Technology, Atlanta, GA, USA
- Jan 2016 – Jun 2016: Intern, Istituto Italiano di Tecnologia, Genova, Italy
- Jul 2015 – Dec 2015: Research assistant, Technische Hochschule Ingolstadt, Ingolstadt, Germany
- Jul 2015 – Dec 2015: Intern, Audi AG, Ingolstadt, Germany
- Dec 2014 – Mar 2015: Intern, BFFT, Ingolstadt, Germany

Education

- Ph.D. in Robotics, Georgia Institute of Technology, Aug 2020
- M.S. in Mathematics, Georgia Institute of Technology, Dec 2019
- M.S. in Mechanical Engineering, Università degli Studi di Napoli “Federico II”, Jan 2016
- M.Eng. in Automotive Engineering, Technische Hochschule Ingolstadt, Mar 2015
- B.S. in Mechanical Engineering, Università degli Studi di Napoli “Federico II”, Sep 2012

Research interests

Robotics

- Robot design and control for long-duration autonomy
- Resilient heterogeneous multi-robot systems
- Human-multi-robot interaction

Control theory

- Optimization-based control design
- Safety of dynamical systems

Teaching

Courses developed (University of Waterloo)

- Special Topics in Control: Robot Dynamics and Control (ECE 780 T03, graduate)

Course instructor (University of Waterloo)

- Introduction to Feedback Control (SE 380, undergraduate)

Short courses

- Optimization-based Control of Robotic Systems, minicourse at the Escola de Matemática Aplicada, Fundação Getulio Vargas (FGV EMap), Rio de Janeiro, Brazil, January 16–27, 2023

Guest lecturer (Georgia Institute of Technology)

- Nonlinear Systems and Control (ECE 6552, graduate)
- Introduction to Automation and Robotics (ECE 4560, undergraduate)
- Robotics (ME 4451, undergraduate)

Invited talks and seminars

- “Analytic center selection of optimization-based controllers for robot ecology”, Università degli Studi di Napoli “Federico II”, Apr 2024
- “Robotic system design for long-duration autonomy”, University of California, Irvine, Mar 2023
- “Design of robotic swarms for long-term environmental monitoring”, Université catholique de Louvain, Feb 2023
- “Ecologically-inspired Robots for Long-term Environmental Monitoring”, Latin American Congress on Industrial and Applied Mathematics, Feb 2023
- “Resilient and Energy-aware Multi-robot Environmental Monitoring”, Tokyo Institute of Technology, Oct 2022
- “The SlothBot: Design and Control for Long-duration Autonomy”, Workshop “Robotics for Conservation”, AUVSI Xponential, Apr 2022
- “Control Design for Long-duration Robot Autonomy”, University of Bristol, May 2021
- —, University of Waterloo, Apr 2021
- —, Heriot-Watt University, Apr 2021
- —, Trinity College Dublin, Mar 2021
- —, The University of Texas at Austin, Apr 2020
- “Constraint-driven control of multi-robot systems. From the otium-negotium duality to the SENNA-PROST duel”, Multi-Robot Systems Lab, Stanford University, July 2019
- “Control Barrier Functions for Enabling Long-Duration Robot Autonomy”, Tutorial “Control Barrier Functions: Theory and Applications”, European Control Conference, Jun 2019
- “Obtaining Control Barrier Functions for Systems Subject to Actuation Constraints”, Tutorial “Control Barrier Functions: Theory and Applications”, European Control Conference, Jun 2019
- “Control of multi-robot systems: from rendez-vous to long-duration autonomy”, Università degli Studi di Napoli “Federico II”, May 2019

Professional activities

Conference workshop, tutorial, and special session organization

- Workshop “Control Barrier Functions: Recent Developments and Future Directions”, IEEE Conference on Decision and Control, 2023

- Tutorial “Ecologically-Inspired Multi-Robot Systems”, IFAC World Congress, 2023
- Research in residence, “Analysis of optimization-based feedback control systems”, Centre International de Rencontres Mathématiques, 2023
- Special session “Mathematical foundations of robot control”, Latin American Congress on Industrial and Applied Mathematics, 2023
- Workshop “Human-Multi-Robot Systems: Challenges for Real World Applications”, IEEE/RSJ International Conference on Intelligent Robots and Systems, 2022
- Workshop “Design, Learning, and Control for Safe Human-Robot Collaboration”, International Conference on Advanced Robotics, 2021
- Workshop “Robot Swarms in the Real World: From Design to Deployment”, IEEE International Conference on Robotics and Automation, 2021
- Tutorial “Control Barrier Functions: Theory and Applications”, European Control Conference, 2019

Program committees

- American Control Conference, 2024
- International Symposium on Distributed Autonomous Robotic Systems, 2022
- International Workshop on Human-Friendly Robotics, 2020

Other committees

- Student Best Paper Award Committee, American Control Conference, 2023
- Undergraduate Studies Committee, Department of Electrical and Computer Engineering, University of Waterloo, 2022–2024

Editor

- Associate Editor, IEEE International Conference on Robotics and Automation, area “Mechanisms, Design, and Control”, 2024
- Associate Editor, IEEE/RSJ International Conference on Intelligent Robots and Systems, area “Multiple and Distributed Systems”, 2023
- Associate Editor, International Journal of Robotics Research, area “Multiple and Distributed Systems”, 2023–present
- Guest Editor, Advanced Robotics, Special issue “Recent Advances in Nonlinear Control Technology”, 2023–present
- Associate Editor, IEEE Robotics and Automation Letters, area “Multiple and Distributed Systems”, 2021–present
- Guest Editor, Autonomous Robots, Special issue “Robot Swarms in the Real World: from Design to Deployment”, 2021–present

Reviewer

- Journals (selected): IEEE Transactions on Robotics, Autonomous Robots, Robotics and Autonomous Systems, IEEE Robotics and Automation Letters, IEEE Robotics & Automation Magazine, IEEE Transactions on Automatic Control, IEEE Transactions on Control of Network Systems, IEEE Transactions on Control Systems Technology, Automatica, International Journal of Robust and Nonlinear Control, IEEE Control Systems Letters, IEEE Transactions on Human-Machine Systems, IEEE Transactions on Vehicular Technology
- Conferences (selected): IEEE International Conference on Robotics and Automation, IEEE/RSJ International Conference on Intelligent Robots and Systems, Robotics: Science and Systems, International Symposium on Multi-Robot and Multi-Agent Systems, IEEE Conference on Decision and Control, American Control Conference, European Control Conference, IFAC World Congress

Professional memberships and affiliations

- Institute of Electrical and Electronics Engineers (IEEE), IEEE Robotics and Automation Society, IEEE Control Systems Society
- American Society of Mechanical Engineers (ASME) Dynamic Systems and Control Division (DSCD) Energy Systems Technical Committee (ESTC)
- International Federation of Automatic Control (IFAC)

Student guidance

Doctoral students

3. Mason Niu, PhD, University of Waterloo, Topic: PDE-based distributed control of robotic swarms
2. Andrew Adel Shenouda Nasif, PhD, University of Waterloo, Topic: Design and control of symbiotic heterogeneous robotic systems
1. Ahmad Nabil Yousef Kamal, PhD, University of Waterloo, Topic: Distributed control of multi-robot systems

Master students

6. Ziyi Wang, MMath, University of Waterloo, Topic: Learning PDE-based control of robotic swarms
5. Sheikh Abrar Tahmid, MASC, University of Waterloo, Topic: Multi-task multi-robot learning
4. Ramisha Anjum, MASC, University of Waterloo, Topic: Human-multi-robot interaction for long-term environmental monitoring
3. Justine Shaw, MASC, University of Waterloo, Topic: Ecological robot design for long-term environmental monitoring
2. Divyesh Kanagavel, M.S. 2021, CNRS, Topic: Human-multi-robot interaction for collaborative grasping
1. Hussein Lezzaik, M.S. 2021, CNRS, Topic: Multi-robot reinforcement learning for active sensing

Undergraduate students

2. Gabriel Luo, Fall 2023–Winter 2024, University of Waterloo, Topic: Safe and computationally efficient control of autonomous vehicles
1. Cheng Tang, Fall 2022–Winter 2023, University of Waterloo, Topic: Reinforcement learning for multi-robot environmental monitoring, software backend for environmental monitoring data handling

High-school students

2. Yoyo Yuan, Winter 2023–Spring 2023, University of Waterloo, Topic: Learning human gestures for human-multi-robot interaction
1. Sean Wang, Winter 2023–Spring 2023, University of Waterloo, Topic: Learning human gestures for human-multi-robot interaction

Scholarships and awards

Scholarships

- Alumni Small Grant Program 2020 “What can robots teach us about the Covid-19 pandemic”, Sep 2020 – Dec 2021
- DAAD scholarship for research stays for university academics and scientists, Nov 2021 – Feb 2022
- Fulbright scholarship, Sep 2016 – Jun 2017

- DAAD scholarship B1, Jul 2015 – Dec 2015
- DAAD scholarship A1, Oct 2013 – Mar 2015

Awards

- Best Paper Award, 2022 IEEE International Conference on Advanced Robotics and its Social Impacts, May 2022
- Best Paper Award Finalist, 2019 IEEE International Symposium on Multi-Robot and Multi-Agent Systems, Aug 2019
- NSF travel award to attend the 2019 IEEE International Symposium on Multi-Robot and Multi-Agent Systems
- Study award “Roberto Rocca Educational Program”, Jul 2015
- Study award “Roberto Rocca Educational Program”, Jul 2013
- 3rd place in the Italian Mathematics competition “MeravigliosaMenteMatematica”, Apr 2009
- Rotary International “Premiazioni alunni meritevoli”, Nov 2008
